

GIMA "S" STAMPING GUN, pneumatic

Images similar

Ideal for convenient embossing of large steel parts in serial production. 8 bar pressure stamps numerals, letters and logos into any type of metal with low noise and low recoil. The gun can be positioned equally on flat or round materials.

Description:

Light hand- held unit with integrated embossing head (type holder) for safe, reliable and deep embossing of metal parts. Suitable for steel, aluminium, brass, etc.

Thanks to the re- development of the type holder it is now possible to place it directly on the workpiece.

- Up to 6 characters can be embossed
- Typeface height: Up to 5 mm
- Typeset: Numerals, letters, special characters
- Maximum pressure 8 bar
- Rapid change of steel types through pin locking
- The unit is suitable for simple positioning against flat and round materials
- The stamping gun is low noise and low recoil

Designs:<b/ >

- "S": (with hexagonal Adapter) round quick change head for short text or logos
- "S1": (6- character) with robustly constructed GIMA type holder
- "S2": (4- character) with robustly constructed GIMA type holder
- "S3": (2-3- character) with round, likewise robustly constructed GIMA type holder

Steel types:

- Special steel types made from high performance stamping steel
- Numerals, letters, logos
- Sharp or dotted engraving
- Text, typeface height and typeface width per requirements
