

## Special Machining

# Special Machining

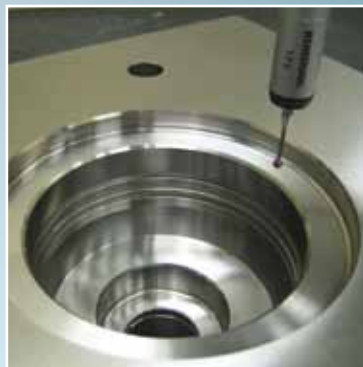

## How can we help you

**DME**, your worldwide supplier for the Plastics Industry, offers a complete service program for plastics and die set molds.

- **molds according to customer's specifications**
- **from simple to complex molds, from 156 x 156 mm to 2000 x 2000 mm**
- **all forms of mechanical machining in a wide range of alloyed and non-alloyed steels.**
- **production is equally suited to plastics and die-cast molds as well as metal stamping press tools**
- **stress relieving of steel is possible**

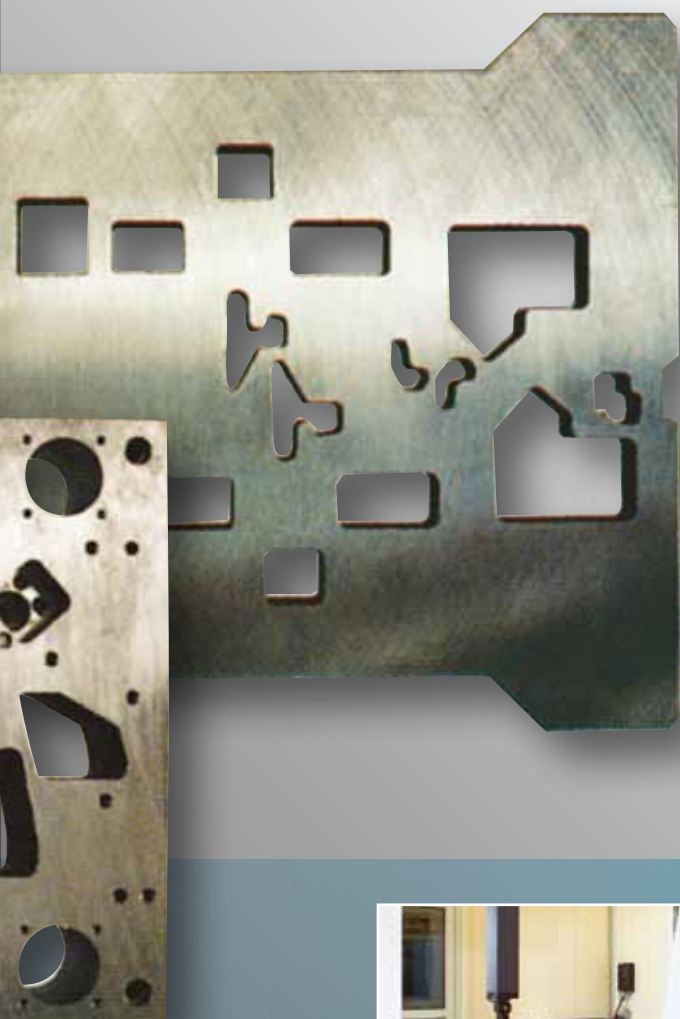

A highly skilled team of product engineers, application engineers and technical sales advisors understand your mold designs and how to efficiently combine all standard technical parts with the special machining you require.

## Large Capacity - High Technology

Milling and drilling of molds	up to 2000x2000mm
Grinding capacity	up to 1500x3600mm
Deep drilling	from Ø 6 to 40mm
Water-jet cutting	2000x4000x100mm
Precision coordinate drilling	1500x 1000mm
Flame cutting	2000x6000x150mm
Annealing/stress relieving	---
Max. weight	10 Ton
2D	dxf, dwg, autocad
3D	step, iges, parasolid, solidworks

Combined with **DME's** global delivery and support capabilities, this offers you the chance to obtain a "prefabricated package" from one source. Allowing you to focus your time and resources on the value-added portion of your business: original design, assembly of the "prefabricated" package and fine tuning of the mold for effective operation.
